Austratus Grid - Aluminium

New thinking. New simplicity.

When it comes to inspiring spaces, nothing makes an impact quite like an architectural timber ceiling, wall or screen.

Colour, warmth, tone and texture – aluminium has a unique, sophisticated appeal.

However, the associated lead times, as well as the need for expert-installation skills, has traditionally rendered genuine timber statements out of reach for many commercial and residential projects ...until now.

Introducing Austratus, a new product innovation from architectural timber specialists, Modinex.

The simplicity and convenience of the Austratus patented system

Our patented fitting system allows continuous lengths of timber to be simply and easily clipped into a suspended ceiling. It can also be screwed directly onto existing walls and ceilings.

Fit-out companies, builders and architects will agree, Austratus makes it easy to achieve brilliant results. How?

Features and Benefits

Design — Suspended grid ceiling solution, designed for quick and ease of installation

Fire rating — Up to BAL 29 or Group 3 fire-rated timber species available (Group 1 if Fireshield coating is applied) and aluminium profiles are AS1530.1 non-combustible or Group 1 fire rated

Sustainability — Available in Green & Supergreen aluminium to reduce CO2 emission by 50-75% or a large range of sustainable timber species

Pre-finished coatings — Available in a range of standard colours

Application — Suitable for internal and out of weather applications only

Grid size — Softwood species are suitable for a grid size of up to 1m x 1m. However, Hardwood species are only suitable for up to 0.6m x 0.6m and a max batten depth of 140mm

How to specify
