Austratus Linear - Aluminium &
Austratus Linear DFM (Direct Fix) - Aluminium

New thinking. New simplicity.

When it comes to inspiring spaces, nothing makes an impact quite like an architectural timber ceiling, wall or screen.

Colour, warmth, tone and texture – aluminium has a unique, sophisticated appeal.

However, the associated lead times, as well as the need for expert-installation skills, has traditionally rendered genuine timber statements out of reach for many commercial and residential projects...until now.

Introducing Austratus, a new product innovation from architectural timber specialists, Modinex.

The simplicity and convenience of the Austratus patented system

Our patented fitting system allows continuous lengths of timber to be simply and easily clipped into a suspended ceiling. It can also be screwed directly onto existing walls and ceilings.

Fit-out companies, builders and architects will agree, Austratus makes it easy to achieve brilliant results. How?

Features and Benefits

Acoustic — Up to 0.9NCR acoustic rated insulation available

Fire rating — Group 1 fire rated

Sustainability — Profiles are available in a large range of sustainable timber species or in aluminium (Green or Super Green to reduce CO2 emission by 50-75%)

Application — Suitable for out of weather or external use

How to specify

Download REVIT files, installation instructions, product care and technical information at modinex.com.au
