## Alu Seleкта Channel

## Australian made and manufactured

Modinex Alu Selekt Channel is an innovative new product made from highly durable aluminium manufactured and coated in Australia. This timber – look non – combustible cladding works seamlessly as a perfect alternative for timber when timber ranges are not suitable. A Eco-friendly, low maintenance and incredibly durable, it's ideal for high rises and bushfire rated areas.

## A new standard of durability

It's a new standard in aluminium cladding, offering new levels of style, new levels of choice and a truly realistic looking timber alternative. Each panel is finished using a powder on powder coating technique, ensuring panels are unique with a natural appearance. Match colours such as Dark Cedar, African Ebony, Silver Oak or Cedar to their Euro Selekt counterparty for a seamless monochromatic style, or mix and match with the many other colour profiles available in aluminum profiles to create eye-catching contrasts and patterns.

You can even utilise our grooved and batten options to achieve different geometric design accents. The Alu Selekt range is non-combustible in accordance with Clause C1.12(e) of the BCA and permitted to be used where the BCA nominates noncombustible material. Install it with confidence to high-rise buildings or in bush fire prone areas and know the only maintenance you'll need is general cleaning. Aluminium is an ideal choice for Australian climates. It's also incredibly hardy – resistant to insects, wind, hail, rain, and the coating has passed a sea salt spray test as corrosive resistant.

Lightweight and easy to work with, Alu Selekt range is deceptively tough and will stand up to the hard knocks. Modinex did not cut any corners, creating a robust 1.8mm thick profile body that is superior to alternative lightweight aluminium claddings on the market. The natural timber panel look comes without all the fuss of sheet panel installation. No need to machine panels off site, adding an expensive and time consuming process to your project. With Alu Selekt Channel, you simply screw the lengths into place.

## Features and Benefits

Compliance — CodeMark, cyclone, sea salt spray certified

Fire rating — AS1530.1 non-combustible

Durability — 25-year structural & 15-year fading warranty (If plain or timber grain powder coating finish is used)

Availability — Manufactured 100% in Australia with a short lead time

Easy to install — Concealed fixings for a refined design for ease of installation

Seamless design — Specially design interlocking tongue allows for secret fixing

Sustainability — Available in Green & Supergreen aluminium to reduce CO2 emission by 50-75%

Design — Available in a range of plain colour or timber grain finishes

Curved design — 70mm wide profile can be curved to a convex radius of 700mm and the 155mm wide profile to a convex radius of 1200mm
